Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 17 October 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Objections

Claim 1 is objected to because of the following informalities: In claim 1 line 2 the input means is referred to as "input means", later in claim 1 line 8 the "input means" is called the "associated input means", the applicant is reminded that the name of the input must remain consistent throughout the entirety of the claims. Appropriate correction is required.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hermann (DE 20022511) in view of Dunne (5926260).

Hermann shows a portable laser distance measuring device with an optoelectronic transmitter and receiver (figure 1 Ref 4 and 5 respectively), an input means (figure 1), an output means (figure 1 Ref 9), both arranged on a convenient housing on the cover plate (figure 1 Ref 1), and an additional input means arranged on a side panel adjacent to the cover plate (figure 1 Ref 10) but does not show that the additional input means is for triggering the measuring operation wherein the additional

Art Unit: 3662

input means is logically OR connected with the input means for triggering the measuring operation. Note that the word for denotes intended use of the additional input means.

Dunne shows an additional input that is for triggering the measuring operation (figures 2, 3 and 5), wherein the additional input means is logically OR connected with the input means for triggering the measuring operation. It would have been obvious to modify Hermann to include the second input means as taught by Dunne because this allows for the ease of use with one hand rather than two.

Referring to claim 2, Dunne shows the additional input means is a push-button (figure 2, 3, and 5).

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hermann (DE 20022511) in view of Dunne (5926260) as applied to claim 1 above, and further in view of Win (4730190).

Win shows an additional input that is visibly identified using an optionally illuminated marking on the cover plate (figure 1A and 1C). It would have been obvious to further modify Hermann to include marking taught by Win because this allows the user to easily identify the location of the additional input means.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Dowsett (4766418) and Bamji (2003/0165048) because both of them include additional input that is visibly identified using an illuminated marking on the cover plate when the input is in use.

Art Unit: 3662

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
